violin tip from the author

violin??

ONE of the instruments from europe,
the vibration range is rather big
and the sound is very beautiful It is played
all the way across the world.

THEY CALL A VIOLIN PLAYER A "VIOLINIST";
THEY CALL A PIANO PLAYER A "PIANIST"
GET THE PATTERN?

first time it appeared?

the first time is known to be early 16th century
the first violins were different from the present
ones in appearance, and only the richest of the rich
were allowed to handle them.
but as for the basic appearances.. well, there isn't a
difference between now and a hundred years ago~~
